

Marine areas 9 and 10 summer chinook season (UPDATED)

WDFW is seeking public input on providing **summer mark-selective chinook fisheries from July 16 to Aug. 15 in marine areas 9 and 10**. Chinook run sizes have decreased in recent years and are anticipated to be low again this year. The department heard from many constituents that the 2015 season for both areas 9 and 10 was not satisfactory. Providing a meaningful and stable fishing season for both areas is expected to be one of the primary discussion points during this year's North of Falcon process. The public is invited to submit ideas or proposals for these two fisheries in 2016.
